

# Internship

## Automatic tagging with AI

**Company size:** 9-12 peoples

**Office location:** Paris (Hôtel de Ville), Lyon (Part-Dieu)

**Keywords:** Data, AI, SaaS, Startup, Early stage

**Web:** <https://yooi.com/>

### Context

Launched in April 2019, YOOI is a well-funded product & SaaS startup focusing on data and collaboration and targeting enterprise customers.

We strongly believe that companies can do much more with their data (Data Science, Machine Learning, AI... you name it!), and as such our mission is to help companies to become successful data-driven organizations.

To support this, we are building a platform, enabling enterprises to plan and execute their data strategy, develop actionable assets from their data, and helping them managing & putting their data in use.

We also deeply believe that human is the key factor of data projects success, that's why we put collaboration as the center pillar of our platform.

Here are a few facts about us:

- We are currently 10 people.
- We benefit from a lot of experience in data & data science projects as well as enterprise customers and have access to a large network of senior advisors.
- We are moving fast, while caring about excellence: from User Experience to Code, details matter.

### Mission

In the platform user can fill information about data project in natural language. The platform also captures a lot of information about company organization and structuration. By analyzing the natural language information, we would like to assist the user by automatically linking the data projects with theses organization & structuration items. Artificial Intelligence tools, such as Natural Language Processing and Machine Learning, will be used to achieve this.

The internship will consist to:

- Learn what are the different kind of information that are present in the platform and how they can be accessed
- Define the automatic tagging functionalities
- Study the different AI tools that could be used to implements and propose a design / architecture of the feature and how it can be integrated in the platform
- Iteratively implement, test, optimize and refine the feature

## Benefits

The internship will give you the opportunity to work on top-notch AI tools applied on a modern SaaS architecture. This expertise is sought after and valued by IT companies. For YOOI it will permit to gain knowledge on AI technics and application and accelerate his roadmap.

The internship is paid:

- 800 € / month if you are in the 1<sup>st</sup> year of the engineering cursus
- 1000 € / month if you are in the 2<sup>nd</sup> year of the engineering cursus
- 1200 € / month if you are in the 3<sup>rd</sup> year of the engineering cursus (end of study project)

You can choose to work remotely or from one of our 2 locations:

- Our headquarter is based in Paris, in one the hippest neighborhood (food enthusiasts & bar lovers ... brace yourself!)
- ... and we have a nice office in Lyon, very near Part-Dieu & Brotteaux

Both those locations are in great neighborhoods & also happen to be very convenient to reach.

## What's next?

**Want to know more?** Have questions? You like it, but feel like you could bring something different than this internship description? Don't hesitate to reach to us, we will be happy to discuss!
